Subject: Agilent Quote - MSD ChemStation Upgrade

Hello Peter,

Per your correspondence with Damon Duppong, I am forwarding a quote for an upgrade of your MSD ChemStation software.

Please note that this quote assumes that your GC and MSD are communicating with the ChemStation PC via a LAN interface, not an HPIB interface. The current revision of MSD ChemStation is not compatible with an HPIB interface.

I am also attaching, for your reference, a document which provides the PC specifications required to run the current revision of ChemStation.

If you should have any questions or concerns relative to this quote please don't hesitate to contact Damon or I.

Thank you again for your continued interest in Agilent's GC/MS products. We value your business and appreciate your time!

Best regards,
Eric Pertschi
